Konecranes Provides Comprehensive Machine Tool Service and Support
Rebuilds, Repair Services, and Maintenance Solutions for All Machine Tool Types and Brands

SPRINGFIELD, OH (August 18, 2010)—Machine Tool Solutions Unlimited (MTSU), a part of Konecranes, Inc., provides comprehensive services and support for all types and brands of machine tools in the manufacturing industry. The experienced and highly skilled machine tool service professionals at MTSU can provide a variety of solutions for a single machine or an entire production facility. MTSU offers flexible resources to meet the requirements of small and large industries, including aerospace, medical, energy, power generation, locomotive, automotive, steel, tool, die, mold, and job shops.

Konecranes Machine Tool Service (MTS) business is one of the largest machine tool service providers in the world, with hundreds of skilled service engineers working worldwide. In 2009, Konecranes acquired MTSU in Cincinnati, Ohio, its first MTS acquisition in the U.S. As a part of Konecranes, MTSU continues to support manufacturing facilities of all sizes with a wide range of machine tool services to help customers improve productivity and cost efficiency in production. Services include rebuilding, remanufacturing, and control retrofitting; new market services; alignments, calibrations, installation/relocations, and repair services; and customized maintenance programs.

MTSU primarily focuses on larger projects that consist of a complete or partial rebuild, remanufacturing, and/or retrofit of controls, motors, and drives of an existing machine. Rebuilding, remanufacturing, and retrofitting can be performed at the customer's facility, or machines may be transported to MTSU's facility for service to minimize disruption to the customer's manufacturing environment. In most cases, these services can return a machine's accuracy to meet or exceed original specifications at a fraction of the replacement costs for new equipment.

MTSU's technical and mechanical understanding of machine tool rebuilding, remanufacturing, and retrofitting makes them uniquely qualified to address geometrical and alignment issues—key components to maintaining a part's true accuracy. In addition to geometry/alignment restoration services, MTSU provides on-site service and support to analyze, repair, calibrate, and/or update machine tool equipment. Other on-site services include urgent response; electro/mechanical repairs; control service and troubleshooting; preventive maintenance; sheet metal covers and enclosures; component rebuilds; and way and ball screw rebuilding, conditioning, and service.

New market services from MTSU provide customers with cutting edge technology to help improve machine tool productivity and overall capabilities. Backed by a diverse representation network, MTSU is able to offer a variety of machine options such as state-of-the art controllers and advanced electronic

components. With access to this modern technology, MTSU can help customers efficiently utilize their existing machine tool while improving its performance. MTSU can also perform small modifications to newer machines and tool room equipment, such as adding rotary tables, pallet shuttles, or other accessories.

With access to numerous respected dealers throughout the U.S., MTSU can provide used machinery to support the customer's metal cutting needs. MTSU also offers custom-designed machines and motion systems for special applications to improve productivity and quality.

In addition to its core services, MTSU offers a range of maintenance services and solutions to help customers maximize machine uptime and minimize downtime. From complete condition monitoring to machine tool assessments and tailored preventive maintenance programs, MTSU can customize maintenance services to meet the customer's needs, helping to extend the lifetime of machine tool equipment and accessories while lowering total maintenance and ownership costs.

To find out more about MTSU and machine tool services, contact an MTSU representative at 513.761.0709, 8711 Reading Road, Cincinnati, OH 45215. Visit them on the web at www.mtsunlimited.com or www.konecranesamericas.com.
